

In the specification:

On page 1, after the Title, please add the following subtitle:

BACKGROUND OF THE INVENTION

On page 4, before the paragraph starting on line 30, please add the following subtitle:

SUMMARY OF THE INVENTION

On page 7, before the paragraph starting on line 6, please add the following subtitle:

BRIEF DESCRIPTION OF THE DRAWINGS

On page 7, before the paragraph starting on line 26, please add the following subtitle:

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

On page 4, rewrite the paragraph starting on line 30 and extending to page 5, line 2, as follows:

~~In accordance with the invention, there is provided an oven having a rotatable portion, the rotatable portion comprising an outer chamber and an inner treatment chamber located within the outer treatment chamber, the inner treatment chamber being adapted to receive material for treatment and the oven further comprising means to heat the inner treatment chamber externally thereof~~ In accordance with the invention, there is provided an oven comprising:

a charging portion for receiving material to be treated;

a rotatable changeover portion comprising an outer chamber and an inner treatment chamber within the outer chamber;

and means to heat the inner treatment chamber externally thereof;

the oven being moveable between a first position in which the changeover portion is generally higher than the charging portion and a second

position in which the charging portion is generally higher than the changeover portion;

the inner treatment chamber being adapted to receive material from the charging portion as the oven moves from the first position to the second position.

On page 5, delete the paragraph starting on line 11 and ending on line 21 as follows:

~~Preferably, the oven further comprises a charging portion for receiving material to be treated and a changeover portion;~~

~~the oven being moveable between a first position in which the changeover portion is generally higher than the charging portion and a second position in which the charging portion is generally higher than the changeover portion;~~

~~in which the inner and outer treatment chambers are provided in the changeover portion, the inner treatment chamber being adapted to receive material from the charging portion as the oven moves from the first position to the second position.~~
